SUMMARY

Involved in tasks assigned to me, working hard until the work satisfies both me and the organization. My efforts contribute to the upliftment of the organization as well as personal growth.

EXPERIENCE

08/2022 - Present

Ahmedabad

Jr. Web Developer

Yudiz Solutions Limited

- Effectively communicated with clients to gather technical requirements, assigned tasks to team members, and consistently presented challenging and R&D-focused tasks with innovative solutions using React.js.
- Developed and delivered high-quality features using third-party libraries such as Stripe, Razor pay, and Speechify, ensuring timely delivery with minimal rework by implementing optimised and reusable code structures.
- Provided insightful suggestions for enhancing project features, contributing to user-friendly and scalable solutions while maintaining adherence to deadlines and client expectations.

12/2019 - 07/2022

Rajkot

Full Stack Developer

Akash IT Solutions

- Managed both frontend and backend development for a fleet management system, starting with 5% frontend progress and successfully delivering the complete project, including creating a Progressive Web App (PWA) from scratch and working on the web application and website.
- Converted existing React class components to functional components and migrated most of the application to TypeScript, improving code readability and maintainability.
- Completed backend development with 90%+ test coverage, including writing database update queries, cron jobs, and thorough test cases to ensure reliable performance.

01/2018 - 11/2019

Rajkot

C# .NET Developer

CBS Software Solutions

- Developed and maintained ERP systems using C# .Net for frontend and MS SQL Server for backend, including writing database queries and stored procedures for efficient data management.
- Provided ERP support through onsite client visits and remote assistance, collaborating with the owner to address client needs effectively.
- Worked on more than 10 ERP systems, including those for casting production lines, NDT processes, cold storage, and customized solutions, while also training new developer batches to ensure smooth onboarding.

EDUCATION

07/2018

Bachelor of Engineering in Computer Engineering

Darshan Institute of Engineering and Technology (Darshan University), Rajkot, Gujarat, India

03/2014

HSC

Shri G T Sheth Vidyalaya, Rajkot, Gujarat, India

PROJECTS

Portobel

portobel.com

Fleet Management System

- Developed key features for the Fleet Management System, including Create Order, Bulk Upload, Fleet Planning, Order Status Updates, and Temperature Analysis integration from third-party devices. Implemented functionalities such as order reports, route planning using Google Distance and Time Matrix API, email/SMS notifications, and cron jobs for temperature readings and status updates.
- Utilized Redux for global state management, Axios for efficient data fetching, React DnD for drag-and-drop functionality, and Notivize for implementing user notifications.
- Provided a seamless user experience across the website, PWA, User Web App, and Admin Panel by ensuring scalable, maintainable, and high-performance code using React.js for the frontend and Express.js for the backend.

Epiko Market

epiko.market

NFT Marketplace

- Developed and optimized key frontend features for the NFT Marketplace using Next.js, including Profile Management with functionalities for Buy History, Sell History, Collections, and more.
- Worked on the NFT Detail Page, ensuring clear and user-friendly presentation of NFT information to enhance user engagement and navigation.
- Contributed to the Discover section, implementing visually appealing and responsive UI designs for seamless exploration of NFTs.

Craftroots

craftroots.com

eCommerce Website of Handicraft Products

- Developed the "My Account" section using Next.js, enabling users to manage their profiles, order history, and personal details efficiently.
- Worked on the Checkout process, implementing seamless payment integration with Razorpay and ensuring a smooth user experience.
- Utilized GraphQL for efficient data fetching, enhancing performance and ensuring seamless interaction between the frontend and the Magento backend.

Fancall

fancall.in

CMS of Mobile Application

- Developed a dynamic dashboard using React.js Class Components to display insightful metrics, enabling effective monitoring and analysis for the mobile application.
- Implemented user management functionality, allowing administrators to modify users, add new modules, update existing modules, and manage application settings through the CMS.
- Collaborated on enhancing the CMS for seamless integration with the Node.js backend, ensuring scalability and efficient workflow alignment with the application flow.
